EXPERIENCE

Sorting Algorithms System
Personal Project
📅 08/2021 - Ongoing   📍 Monterrey, Nuevo León. México

Developed a terminal program using C++ to create a menu where you can use the different sorting algorithms to compare and learn the efficiency and complexity of the algorithm. Planning on making it a website application to create a more visual and complete experience.

Inventory System
School Project
📅 08/2020 - 12/2020   📍 Monterrey, Nuevo León. México

For my final project I developed a terminal inventory system using python that can be used to register sells, register new articles to the inventory, generate reports about the salesmen, and many more.

Mobile iOS App - Pocket-Kit
SCHOOL PROJECT
📅 04/2019 - 04/2019   📍 Monterrey, Nuevo León. México

In this project I used my skills to code an overall health application to cover all sorts of emergencies from first aid techniques, diseases, call and hospitals near you in case of an emergency and having a healthy lifestyle. All stored in one convenient app that can help a lot of people.

SKILLS
